

FARMING EVOLUTION 2019

Featuring: Christine Jones

Also Presenting: Raj Khosla, Candy Thomas, Eric Westra, Scott Speck, Rainfall Simulator

Event Center, Phillips County Fairgrounds, Holyoke, CO

Wednesday, February 20th – 8:30 a.m. – 4:30 p.m.

Social with snacks - 4:30-5:30 p.m.

Thursday, February 21st – 8:30 a.m. – 2:00 p.m.

Check-in, coffee & rolls: 7:30 a.m.

Registration By 2/8, \$30 single day, \$40 both days

Registration After 2/8, \$40 single day, \$50 both days

includes lunch, breaks and social

Christine will spend a good deal of time explaining how we can build new top soil. She'll explain the amazing power of diversity. She'll also talk about how Pasture Cropping can benefit the soil and producer. Pasture Cropping is seeding annual crops into former cropland seeded to grasses. This includes CRP, Soil Bank, or go back lands.

Raj Khosla will speak about Precision Nutrient cycling and the Precision Climate Smart Agriculture. He will explore the connection between soil variability & precise crop inputs.

Seeing is believing, and nothing makes an impression like a Rainfall Simulator. Water behavior in & on soils with different tillage & cropping histories is fascinating.
