

Turbocharge Your Soybean-Corn Rotation With Cover Crops and Grazing

Workshop & Field Lab September 14

Green Cover Seed, 918 Road X, Bladen, NE 68928

Featuring

Jimmy Emmons

and

Candy Thomas

Recognized for conservation practices and land ethics on their diverse 2,000 acre farm and 6,000 acre ranch, Jimmy Emmons and wife, Ginger, are the inaugural Leopold Conservation Award winners for Oklahoma. Focusing on soil health principles on both cropland and rangeland Jimmy has improved soil health along with financial stability of the farm. Learn about the system it takes to build carbon and revenue, including: covers, companions, pollinators, grazing and cash crops!

As a soil health specialist with the Kansas USDA NRCS, Candy Thomas travels the region educating on the principles of soil health and advising producers on the importance of conservation methods on their farms.

12:00 - 12:30 PM - Registration
