## Spring Soybean Field Days

Two opportunities to attend spring field days to see soil health practices in action!

These two field days, sponsored by a grant from the Kansas Soybean Commission, allow you to see how cover crops can be used to enhance your cash crops and bottom line. If you have questions about how to incorporate livestock into your operation this is a great opportunity to visit with producers who had the same questions and learn from their experience. You will also see how cover crops can be used as an alternative weed control in soybeans, and how this allows for extended rotation synergism. Please RSVP for lunch at [www.Notill.org](http://www.Notill.org) by April 27th.

**May 2**

Santa Fe Trail Farms

1525 31 Road, Windom, KS (doesn't show up on google) 4 ¼ miles south of Hwy 56 on Plumm Road
